

DANDY Mini Paint Roller Cleaner

Figure 1

Figure 2

This tool can be used with most standard and corner mini roller sleeves

- 1 Fit Mini Roller Cleaner into drill as shown and tighten chuck firmly. Place spacer if required as shown in figure 1 for the standard mini roller or figure 2 for the corner mini roller.

- 2 Remove Roller from frame and slide onto the Mini Roller Cleaner ensuring the spring clutch is compressed. The spring will recover to balance the friction force on the spindle and so the roller will be retained in position on the spindle of the cleaner. Hold drill with the attachment fixed centrally and vertically in an empty container and spin for 7 seconds.

- 3 Remove the roller sleeve from the attachment and rinse thoroughly in an appropriate solvent.

- 4 Dry hands and repeat 2 and 3 if necessary

General Recommendations.

1. Recommended drill speed: 1800 - 2500 rpm.
2. Wipe any solvent spillage off Dandy attachments immediately.
3. Lower the roller sleeve and attachment into a bucket deep enough to contain all spray during spinning. The top of the roller sleeve should be at least 10cm below the rim of the bucket during spinning.
4. Solvents should be used in accordance with manufacturers instructions.

Important Safety Notes.

1. Usual precautions should be taken when using electrical tools in the vicinity of liquids.
2. To avoid electric shocks ensure hands and drill are dry. Switch off electric supply immediately if drill becomes wet.
3. If equipment vibrates in use switch off immediately and ensure the roller sleeve is located securely on the attachment.
4. If using solvents or paints which irritate the skin or eyes or which may cause other damage, use appropriate protective
