

DANDY Decorators Tools Instructions for use

Paint Brush Cleaner

This tool can be used with most ½" to 3" Paint Brushes in drills with a 10mm chuck capacity.

- 1 Slide attachment fully into the drill chuck and tighten securely.
- 2 Insert brush in to the attachment ensuring that the brush handle passes between retaining springs, as shown. Hold the drill with the attachment fixed centrally and vertically in an empty bucket and spin for 7 seconds.
- 3 Remove the brush from attachment and rinse in an appropriate solvent. Spin as in step 2.

General Recommendations

- 1 Recommended drill speed: 1800 - 2500 rpm.
- 2 Wipe any solvent spillage off Dandy attachments immediately.
- 3 Lower brush and attachment into a bucket deep enough to contain all spray during spinning. The top of the brush attachment should be at least 8cm below the rim of the bucket during spinning.
- 3 Solvents should be used in accordance with manufacturers instructions.
- 4 Do not use with brushes that have flexible, rubber or rubber covered handles.
- 5 If the brush handle shape is such that there is no definite point of grip for the springs or the brush handle does not appear to be held tightly it will be helpful to wrap some masking tape around the handle where the springs will locate to assist grip.

Important Safety Notes

- 1 Usual precautions should be taken when using electrical tools in the vicinity of liquids.
- 2 To avoid electric shocks ensure hands and drill are dry. Switch off electric supply immediately if drill becomes wet.
- 3 If equipment vibrates in use switch off immediately and ensure the brush is located securely in attachment.
- 4 If using solvents or paints which irritate the skin or eyes or which may cause other damage, use appropriate protective equipment.

You need never throw a brush or roller sleeve away again!

WARRANTY

DANDY products carry a one year warranty against defective workmanship and materials. Should your Dandy Paint Brush Cleaner fail please contact us at the address below about our replacement policy. This guarantee is offered in addition to and does not diminish your statutory rights. Please note the products are guaranteed for normal use but NOT against misuse.
