

DANDY Decorators Tools Instructions for use

Paint Roller Cleaner

This tool can be used with most 1½" and 1¾" Paint Roller Sleeves from 7" to 15" long, in drills with an 8 mm chuck capacity.

- 1 Slide attachment fully into the drill chuck and tighten securely.
- 2 For 1½" diameter Roller: push roller sleeve onto the attachment and slide the roller sleeve towards the appropriate shoulder. Hold the drill with the attachment fixed, centrally and vertically in an empty bucket and spin for 7 seconds.
For 1¾" diameter roller sleeves: slide on end cap and use the same procedure as for the 1½" diameter sleeves.
- 3 Remove the roller sleeve from attachment and rinse in an appropriate solvent. Spin as in step 2.
- 4 Repeat 3 if necessary.

General Recommendations

- 1 Recommended drill speed: 1800 - 2500 rpm.
- 2 Wipe any solvent spillage off Dandy attachments immediately.
- 3 Lower the roller sleeve and attachment into a bucket deep enough to contain all spray during spinning. The top of the roller sleeve should be at least 10cm below the rim of the bucket during spinning.
- 3 Solvents should be used in accordance with manufacturers instructions.

Important Safety Notes

- 1 Usual precautions should be taken when using electrical tools in the vicinity of liquids.
- 2 To avoid electric shocks ensure hands and drill are dry. Switch off electric supply immediately if drill becomes wet.
- 3 If equipment vibrates in use switch off immediately and ensure the brush is located securely in attachment.
- 4 If using solvents or paints which irritate the skin or eyes or which may cause other damage, use appropriate protective equipment.

You need never throw a brush or roller sleeve away again!
